

Sample Business Requirements Documents Template

- Problem : Due to 'industrialisation' various type of pollution are produced and it affects on human skin and everyone can suffer from issues related to skin. To avoid such problems we developed an application with the help of expert doctor ~~them~~ teams. The application is based on to scan your face skin and it will give a proper guideline that which things will you prefer to use and keep away from any side effects related to skin. Also it reduce to time and money and To avoid skin disease problem the application need to developed.

1.) Executive Summary Snapshot :

- Research has shown that we need to develop an application or website for health related human being
- The application is available for 24*7
- This research data indicates that the populations are spread in all over the world and the doctor are in limited number with specific time. So we need to developed an applications on large

Scales:

- The scope of the proposed project is in large in all over the world.
- The current process only allows to make application in one state, Occasionally, the proposed process allows us to make application in all over the world.

2. Project Description :

- The main motive of making an application to help or avoid from skin problem by giving proper guide related to skin and what should be used to avoid side effects by using wrong material that are not suitable for particular skin.
- Current Solution: Nowadays everyone prefer to Hospital. But it is not possible to go everytime. Also in some area there are fake doctor they do not know that should they prefer to patient that what should they used for that everyone cannot afford to paying money on Hospital everytime. For that we are making an applications eco-friendly

- To making an application for all over world present on following challenges

- To provide this application to customer's with full of privacy.
- Awareness about application
- The application is full of safety and Eco-friendly.

- Why we need to take this project?

- It will make everybody life healthy and easy.
- Nowadays we are suffering from polluted air that affect on health related diseases.
- By solving / makings this application we can reduced skin related problems that is major problem facing by people. it help them to live a safety life.

3) Project Scope:

- Project special Goals: We need to reach out to every customer by doing our best and give our best product.

⑥ **Tasks:** Our task is that we will make an user friendly app, where common people can also be afford without paying anything.

- The app features are the customer are able to scan their face, skin with the name and location, etc through which expert team of doctor analysis it and give them proper treatment based on skin analyse.

- It is online mode of treatments.

⑥ **Costs:** Approximately, we need 50,000 for making a single application, in which we need to pay with our team members and also there are some legal fees and taxes associated with our companies, ultimate goal is to make profit, so, we will need to look on that also.

- **Deadlines:** We need to give some deadlines by discussing with our team member in which we will give our final product (Application) such that we will provide you app in 1 Month.
